EXPERIENCE

Vidyard

May 2017 – Jan 2020

Product Designer

Helped define the strategy and direction of Vidyard's products (Freemium and Commercial) with the product team, shipped multiple products as the sole designer on a cross-functional team and created the first design system at Vidyard.

Vidyard Free & Pro

Designed and shipped Vidyard's first freemium product offering. A video communication product designed to quickly help users record and share videos with colleagues or clients, and engage their viewers with custom CTA's. The product exhibited high activation and retention rates and has gained over 1k paying customers within the first 6 months of launch.

Vidyard Design System

Defined the strategy and design direction of the design system for use across multiple Vidyard products. The design system is a set of components, patterns, and guidance used to build products for Vidyard's thousands of users. The design system created a more coherent and high-quality experience across all of Vidyard's products and decreased communication overhead between multiple teams. All products using the design system showed improved user activation and retention.

Vidyard Partner App

Designed and shipped an integrated app used by HubSpot, Outreach, Marketo (Adobe), Zendesk and more partners. The app provides easy access to any owned videos on a team and allows the recording of new videos all within the user's preferred platform. The Partner App was a key element of the Vidyard-Hubspot partnership and the launch of HubSpot video. On average, 15-20% of the yearly revenue is attributed directly to the Partner App ecosystem since launch.

Freelance Design

Jan 2016 – Today

Designer

Designer on multiple mobile and web products. Some of my clients include HyperComply, Vidhub, Lumos Business, Evergreen Digital Marketing, Room for Tea Inc, Snapwise Inc, and Diamond Inc.

Kaizena

Sep 2015 – Dec 2015

UX & UI Designer

Designed and shipped Kaizena's first iOS app. Kaizena is an education platform designed to improve learning outcomes by providing students with personal, high-quality feedback from their teachers.

SKILLS
